SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the **“Financial Information of the Company”** and the related notes, **“Our Business”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** on page 130, 91 and 177 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in **“Risk Factors”** on page 25 and **“Management Discussion and Analysis of Financial Condition and Results of Operations”** on page 177 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the **“Restated Financial Statements”**.

INTERNAL RISK FACTORS

1. **We have a limited operating and financial history, which makes it difficult to accurately assess our future growth prospects. Further, our restated financial statements for Fiscal 2020 (June 21, 2019 to March 31, 2020) and Fiscal 2021 and 2022 are not comparable due to our Company’s formation in June 2019.**

Upon incorporation of our Company on June 21, 2019, we acquired the profile sheet machinery setup of our Group Company, Kaka Engineering Private Limited (formerly known as Kaka PVC Profile Private Limited) in 2019 and started manufacturing profile sheets in the same year itself. As such, we have a limited operating history, and our success is dependent on our ability to effectively implement our business strategies. Our limited financial and operating history may not provide an accurate basis for investors to understand our business and financial history for comparative analysis and evaluate our future business and financial prospects.

In addition, our results of operations for Fiscal 2020 include the period beginning from June 21, 2019 to March 31, 2020 and is therefore, not comparable to our results of operations for other full fiscal years i.e. 2021 and 2022. Further, until Fiscal 2022, our Company did not have any subsidiaries, associates and joint ventures, and no consolidated financial statements were prepared. In the nine months period ended December 31, 2022, we formed a Joint Venture in the form of partnership firm, i.e. Shri Rang Energy Efficient which is taken into consideration for the purpose of preparing the Restated Consolidated Financial Statements for nine

months period ended December 31, 2022. Accordingly, our results of operations in Fiscal 2021 and 2022 are not comparable to that for nine months period ended December 31, 2022 not only due to the difference in the length of the fiscal period but also since our consolidated results of operations in the period ended Dec. '22 includes the consolidated results of operations of Shri Rang Energy Efficient. Assessing the future prospects of our business is challenging in light of both known and unknown risks and difficulties we may encounter, and could place significant demands on the management team and our other resources. While we may have experienced success in initial years, there is no assurance that we will succeed in the long term. Consequently, any reduction in demand of Polymer-based profiles or decrease in production of profiles, could result in significant loss which in turn will lead to lower revenues and gross and operating margins resulting into material adverse effect on our business, financial condition and results of operation. Although, our Promoter, Chairman & Managing Director, Mr. Rajesh Dhirubhai Gondaliya has more than 20 years of experience in the field of PVC profile and related products, we are still subject to all the business risks and uncertainties associated with setting up any new business venture, which may adversely affect our business, prospects, results of operations and financial condition.

2. We operate in a price sensitive industry wherein the purchasing decisions of consumers are highly influenced by the product price. Our inability to continue to offer our products at competitive prices may adversely affect our business, results of operations and financial condition.

We operate in PVC profile industry wherein the purchasing decisions of consumers are highly influenced by the product price. We may not always be able to offer our products at price points which represent value for money and is competitive in the market. Accordingly, PVC profile companies like us need to be able to reduce their operating costs in order to maintain profitability while maintaining rigorous quality standards. Our dealers also negotiate for monetary benefits as the volume of their sales increase. Our ability to maintain and enhance our competitiveness through our competitive pricing strategy will have a direct effect on our business, financial condition and results of operations. There can be no assurance that price hikes will not take place in the future. If we are unable to maintain our pricing competitiveness and are not able to effectively respond to competition from existing manufacturers and prospective entrants and consequent pricing pressures our business, financial condition and results of operations can be adversely affected.

3. We face competition, including from other large and established competitors, and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our Products which may lead to reduced prices, operating margins, profits and further result in decline in revenue.

We face increasing competition from our existing and potential competitors in India and in overseas markets that may have substantially greater brand recognition, longer operating histories, greater financial, product development, sales, marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Some of our significant competitors in the organized segment includes Dhabriya Polywood Limited, Sintex Plastics Technology Limited and Fenesta Building Systems - (A division of DCM Shriram Limited). Our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to gain market share. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, including dealers of our products, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. Further, if the Government reduces the import duty on PVC profile in India, we may face increased competition from international players, which may have higher appeal to consumers in terms of variety and pricing. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively.

Competition in our industry is based on a range of factors including pricing, marketing, delivery time, payment terms etc. To remain competitive, we must continue to invest significant resources in capital expenditure, research and development, sales and marketing and customer support. There can be no assurance that we shall have sufficient resources to make these investments or that we shall be able to make the technological advances necessary to be competitive. In case we fail to effectively compete, including any delays in responding to changes in the industry and the market, we may also have to incur additional costs and expenses to conduct marketing campaigns, market research and investing in newer technologies and infrastructure to effectively compete. Increased competition could result in, amongst other things, a slowdown in the growth of our corporate accounts, a loss of our market share, price reductions, reduced demand for our Products, reductions in revenue and reduced margins and profitability.

Further, we may be subject to risk of consolidation amongst our competitors who may leverage their financial strength and market dominance to secure financing at competitive terms. Such a consolidation shall enable these market players to take aggressive steps, including but not limited to, making additional acquisitions, investing more aggressively in product development and capacity and displacing demand for our Products. The market in which we operate is fragmented and in case there is a trend of consolidation in future, our business could be at a comparatively disadvantageous position and as a result our business, results of operations, financial condition and prospects could be materially and adversely affected.

- 4. We face competition from substitutes of our products and if consumers' preferences for any of these substitutes increases it could lead to a reduction in the demand for our products, which could have a material adverse effect on our business, financial condition and results of operations.**

In addition to competition from players in the polymer profile industry, we also face competition from substitutes for many of our products. For instance, the doors made up from PVC, WPC or uPVC profile competes with wooden doors, glass doors, aluminium doors and other type of doors. Increases in consumers' preferences for any of these substitutes could lead to a reduction in the demand for our products, which could have a material adverse effect on our business, financial condition and results of operations. Customer preferences in the markets we operate are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage.

- 5. Majority of our revenue is dependent on single business segment i.e. polymer based profiles. An inability to anticipate or adapt to evolving upgradation of these products or inability to ensure product quality or reduction in the demand of these products may adversely impact our revenue from operations and growth prospects**

Majority of our revenue is dependent on single business segment i.e. polymer based profiles. Our continued reliance on single business segment for substantial portion of our revenue exposes us to risks, including but not limited to, reduction in the demand of the products in the particular segment in the future; increased competition from regional and national players; the invention of superior and cost-effective technology; fluctuations in the price and availability of the raw materials; changes in regulations and import duties and the general economic conditions. Any occurrences of such event could significantly reduce our revenues, thereby materially adversely affecting our results of operations and financial condition.

- 6. We are primarily dependent upon few key suppliers for procurement of raw materials. Any disruption in the supply of these raw materials or fluctuations in their prices could have a material adverse effect on our business operations and financial conditions.**

One of our primary raw materials comprise PVC resin, which is derived from crude oil by-products. Crude oil prices are volatile and any major upward movement in the price of crude oil leads to increases in the prices of the PVC resin. The prices of these raw materials may also fluctuate based on exchange rate, customs & duties levied on imports or changes in government policies with respect to these materials or the countries supplying the same. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the results of our operations and our financial conditions.

We procure PVC resin mainly from Reliance Industries Limited, with whom we do not have any long-term supply contracts and therefore, we cannot assure you that we shall always have a steady supply of raw material at prices favourable to us. Inadequate supply of such raw materials caused either by a sudden change in the prices or imposition of any new taxes or for any other reason could have a material adverse effect on our business operations and financial condition. In case of loss of any of our existing major vendors for any reason, it would have a material adverse effect on our business operations and profitability. For Fiscals 2020, 2021, 2022 and the nine months ended December 30, 2022, our cost of materials consumed (on standalone basis) were ₹ 3716.89 lakhs, ₹ 5596.42 lakhs, ₹ 9191.58 lakhs and ₹ 8409.94 lakhs, respectively, representing 89.59%, 71.07%, 78.59% and 73.98% of our Revenue from Operations respectively. If we cannot fully offset increases in the cost of raw materials, through increases in the prices for our products, we would experience lower margins and profitability, which would have a material adverse effect on our financial condition and results of operations.

Further, we do not have long term agreements with any of our raw material suppliers and we acquire such raw materials pursuant to our purchase orders from suppliers. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, tariff disputes, transportation and labour costs, labour unrest, natural disasters, competition, import duties, the outbreak of infectious diseases such as COVID-19, tariffs and currency exchange rates and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

Our suppliers may be unable to provide us with a sufficient quantity of raw materials, at prices acceptable to us. Further, we may not be able to renegotiate our pricing or delivery terms on a reasonable basis or find suitable alternative suppliers in the future, which may affect our business, financial condition, cash flows and results of operations. Any extended interruption in the supply of raw materials could disrupt our operations and can have a material adverse effect on our business, results of operations or financial

condition. Although we believe we have maintained stable relationships with our suppliers in the past, we cannot assure you that, we will be able to source adequate quantities of raw materials in a timely manner from our existing suppliers in the future or we will be able to find alternative suppliers at acceptable prices and quality levels. Our inability to do so may adversely affect our reputation, business, results of operations and cash flows.

7. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Our Company is not in possession of certain Government Approvals which inter-alia includes (a) consent to operate and consent to establish from Gujarat Pollution Control Board in respect of its manufacturing facilities and fabrication unit, (b) Professional tax registration for certain of its business premises situated in Gujarat and Hyderabad (c) Registration under the Shop & Establishment Act in the respective state laws for depots located at Gagilapur (Telangana), Dadri (Uttar Pradesh) and Surat (Gujarat) and all the Godowns (d) ESIC registration for all the factory workers/ employees in the manufacturing facilities & godowns at Gandhinagar, Gujarat and (e) Fire NOC in respect of registered office and other applicable premises. Upon cognizance being taken by the appropriate authority, the Company and its officers in default may face penalties and/or prosecution under the extant provisions, which could have an adverse impact on our business, results of operations and cash flows. Also, our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company's former name. For details regarding pending approvals, please refer to section titled "**Government and Other Approvals**" beginning on page 188 of the Draft Red Herring Prospectus. In addition, as we are setting up a new manufacturing facility, we will need to obtain certain statutory licences/approvals including but not limited to, factory licence and consent to establish and consent to operate from Pollution Control Board etc. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

8. Our Company, Promoters and Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition

9. Our company has not complied with certain statutory provisions of the Companies Act, 2013. Such non-compliance may attract penalties against our Company which could impact the financial position of us to that extent.

Our Company has not complied with certain statutory provisions under the Companies Act 2013, for instance, our Company has commenced its business before filing of the form INC-20A which is in non-compliance of the provisions of Section 10A of the Companies Act, 2013. Further, our Company has made some clerical errors in documents and form filed with RoC, in respect of Form DPT-3, Form AOC-4 and has made inadequate disclosures in Board Reports and its annexures. In addition, our Company has not filed e-form CHG-1 for creation of charge on certain vehicle loans and business mortgage loan, which is a non-compliance of Section 77 of the Companies Act, 2013. Further the company has not filed Form MSME for FY 2019-20 to FY 2022-23 for details of MSME Creditors whose dues were pending for more than 45 days which was required to be filed Pursuant to Order 2 and 3 dated January 22, 2019 issued under Section 405 of the Companies Act, 2013.

Also, our company has made errors in complying with certain Accounting Standards in the past such as AS-15 (Employee Benefits), however the same have been duly complied by the company in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

10. Demand for our products (polymer-based profile sheets) is closely tied to the levels of residential and non-residential construction activity in India. Any reduction in the activity in one or both of these markets could have a material adverse effect on our business, results of operations and financial condition.

Our business is heavily dependent on the performance and market trends of the construction & real estate sector (residential and non-residential) in India. Our polymer-based profiles find application in doors, windows, partitions, false ceilings, wall paneling, kitchen cabinets & other interior and exterior works, which is directly related to construction and real estate segment. The real estate and construction sector may be affected by various factors outside our control, including prevailing general economic and market conditions, changes in the applicable governmental regulations, demographic trends, employment and income levels and interest rates, among other factors. In the event of any downturn or cyclical fluctuation in the construction sector affecting the demand of polymer-based profiles or any developments that make our products less economically beneficial, could have an adverse impact on our business, financial condition and results of operations.

11. We do not own the registered office, manufacturing facilities and godowns from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.

Our registered office, manufacturing facilities and godowns from which we carry out our business activities are being taken by us on rent from third parties. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could lead temporarily impact our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled "**Our Business-Properties**" beginning on page 91 of this Draft Red Herring Prospectus.

In addition, few of the agreements pertaining to the lease/rent has irregularities of enforceability, such as non-registration of agreement and inadequate payment of stamp duty, which may affect the evidentiary value of the relevant agreements in specific performance or other injunctive procedures in a court of law, and could impair our operations. Further, it may result in levy of penal charges, in case cognizance being taken by concerned Authorities.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

Further, we have made investment in certain properties, which are not currently giving us any monthly rental income. In case, we

are not able to generate any significant returns from such invested properties, our results of operations and financial condition can be adversely affected.

12. Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers, which are mainly our dealers. For instance, our top ten customers for the nine months period ended Dec.'22 and F.Y. ended March 31, 2022 accounted for 32.33% and 37.68% of our revenue from operations for the respective period/year. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

The contribution of our top ten customers in our sales as a percentage of the revenue from operations during nine months period ended Dec.'22 are disclosed hereunder:-

S. No.	Customer	% contribution in the revenue from operations for nine months ended Dec.'22
1	Customer 1	4.94%
2	Customer 2	4.66%
3	Customer 3	3.47%
4	Customer 4	3.42%
5	Customer 5	3.40%
6	Customer 6	3.08%
7	Customer 7	2.76%
8	Customer 8	2.30%
9	Customer 9	2.18%
10	Customer 10	2.12%
Total		32.33%

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. Such defaults/ delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

13. We have not registered the trademarks which we are using for our business. If we are unable to protect our intellectual property against third party infringement or are found to infringe on the intellectual property rights of others, it could have a material adverse effect on our business, results of operations and financial condition.

We have not registered the trademarks which we are using for our business. However, few of the trademarks are being registered in the name of the sole proprietorship, Shreeji Plast Mart which is owned by our Promoter, Rajesh Dhirubhai Gondaliya, which is used by us in the modified form. In respect of such trademarks, we have not entered into any assignment agreement or license agreement

with him as permitted under the Trade Marks Act 1999, however, we have been permitted by the owner of the trademark namely Rajesh Dhirubhai Gondaliya, to use the aforementioned trademark. While we believe that the NOC shall continue to remain in place and will be renewed from time-to-time basis, we cannot assure that the same will not be revoked in future. We may not be able to protect our rights in the said trademarks assigned to us through NOC instead of executing formal Assignment Agreement or License Agreement as it may not be acceptable in legal proceedings under the extant provisions of trade marks law. Further, in the event of non-renewal/ revocation of NOC, we may be forbidden from using this trademark and this may affect our brand image adversely. There can be no assurance that we will be able to register the trademarks in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

In addition, the use of similar trade names by third parties may result in confusion among our customers, and we are exposed to the risk that entities in India and elsewhere could pass off their products as our products, including imitation products, which may adversely affect sale of our products, resulting in a decrease in market share due to a decrease in demand for our products. Such imitation products may not only result in loss of sales but also adversely affect our reputation and consequently our future sales and results of operations. In the event of such unauthorized use, we may be compelled to pursue legal action for the protection of our brand and intellectual property, which may divert our attention and resources thereby affecting our business operations. Any litigation, whether or not it is resolved in our favour, could result in significant expense to us and divert the efforts of our technical and management personnel, which may adversely affect our business operations or financial results. For any of these reasons, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property.

For further details on above and other trademarks, please refer to chapter titled “*Our Business*” beginning on page 91 of this Draft Red Herring Prospectus.

14. Setting up of a new manufacturing facility requires substantial capital outlay before we realize any benefits or returns on investments.

In order to capitalize on the future demand, we currently are in process of setting up a new manufacturing plant in village Lasundra, Kheda district (Gujarat), in order to increase our manufacturing capabilities. The land on which the said plant is being constructed comprises of over 49,000 sq. mtrs. area and is obtained by us on lease from our Promoter Director, Mr. Bhavin Rajeshbhai Gondaliya for a period of 30 years till March 26, 2053. The total cost for setting up new manufacturing plant is estimated to be ₹ 27 crores. In order to finance the said project, we have been sanctioned a term loan of ₹ 20 crores from SIDBI. Further, the remaining cost is expected to be funded from the promoter’s contribution and/or any other source as may deem fit by the Board of Directors.

We expect our long-term capital requirements to increase significantly to fund our intended growth and we cannot assure that we shall efficiently be able to obtain sufficient capital resources for these expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity-linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected. Additionally, on account of such expansion, our finance cost, depreciation and other related expenses shall increase in the near future which can adversely impact our results of operations, cash flows and financial condition.

Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing facilities, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management. There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects.

The proposed expansion will require us to obtain various statutory approvals or amend existing statutory approvals, including consent to establish, consent to operate, factory licence etc. There can be no assurance that we will be able to obtain these registrations and approvals including approvals in relations to power and water procurement in a timely manner or at all, which in turn may materially and adversely affect our growth prospects, financial condition, results of operations and cash flows.

Our expansion plans and business growth could also strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce. We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

15. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications regarding the raw material composition may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers, product liability claims and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition.

16. Our continued operations at our manufacturing facilities are critical to our business and any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facility, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our manufacturing facilities are subject to operating risks, such as breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. In case, the supply is not available for any reason, our production schedule may be hampered. Further, our customer relationship, business and financial results may be materially adversely affected by any disruption of manufacturing operations of our products, including as a result of any of the factors mentioned above.

17. Any failure on our part to effectively manage our inventory may result in an adverse effect on our business, revenue from manufacturing operations and financial condition.

We are a manufacturing company, and, at all points of time, a certain portion of our assets comprises of an inventory of raw materials, work in progress products and finished products. Maintaining sufficient inventory of raw materials is critical for our operations including as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations.

In the event we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to situations that require us to block more capital and increase our operating costs in connection with inventories and further expose us to variations in raw materials risk. Equally, if we underestimate our requirements for raw materials, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers which could adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations and adversely affecting our working capital requirements.

Additionally, if our inventory of finished products is not dispatched on time or if there is any unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

18. Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

As on the date of this Draft Red Herring Prospectus, we have three manufacturing facilities at village Zak, Gandhinagar district, Gujarat, which has a cumulative production capacity of 15,425 MT for manufacturing PVC profile, 2,995 MT for WPC profile & sheet, 2,022 MT for uPVC door & window profile. In Fiscals 2023, 2022 and 2021, our overall capacity utilization is detailed below:

PVC Profile

Particulars	2020-21	2021-22	2022-23	Existing Installed Capacity (p.a.)
Installed Capacity (in Mt)	11,719	15,425	15,425	15,425
Actual Production (in Mt)	7,159	8,570	8,584	
Capacity Utilization (in %)	61.09%	55.56%	55.65%	

WPC Profile & Sheet

Particulars	2020-21	2021-22	2022-23	Existing Installed Capacity (p.a.)
Installed Capacity (in Mt)	1,872	2,995	2,995	2,995
Actual Production (in Mt)	1424	1755	2,679	
Capacity Utilization (in %)	76.07%	58.60%	89.45%	

uPVC Door and Window Profile

Particulars	2020-21	2021-22	2022-23	Existing Installed Capacity (p.a.)
Installed Capacity (in Mt)	599	1273	2022	2,022
Actual Production (in Mt)	109	606	705	
Capacity Utilization (in %)	18.27%	47.62%	34.88%	

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

19. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

We have obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of, among others, stock insurance, workman compensation insurance, property insurance (building, furniture & fixture and plant & machinery), keyman insurance and vehicle insurance in respect of certain of our premises and vehicles. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as cash in transit, machinery breakdown, keyman insurance (other than Mr. Rajesh Dhirubhai Gondaliya), group personal accident or mediclaim policy. Further, we have not taken insurance in respect of certain premises that includes (i) manufacturing facility at Supreme -2, Industrial Park, Zak (ii) godown at Block No 339, Industrial Area Zak, (iii) godown at Plot No 1 and 2, Survey No. 282, Zak and (iv) fabrication unit at Survey No. 65 to 71, Bhagwati Nagar, Village Kathwada, Taluka Dascroi, District Ahmedabad. Also, we have not taken insurance for construction material kept at the development site at Lasundra, Kheda. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

20. As we continue to grow, we may not be able to effectively manage our growth and the increased complexity of our business, which could negatively impact our brand and financial performance.

Continued growth of our business and user base requires us to expand our product portfolio, strengthen our brand recognition, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies, secure more space for our expanding workforce, and devote other resources to our business expansions, among others. As we continue to

grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. If we are not able to manage our growth or execute our strategies effectively, our expansion may not be successful and our business and prospects may be materially and adversely affected. We have experienced certain operating/ distribution/ manufacturing difficulties in the past in ramping up certain production/ delivery/ in a timely manner to meet the increasing demand and purchase orders from our customers. As we continue to expand, we may experience similar difficulties if we are unable to manage our growth, which may adversely affect our reputation and results of operations.

21. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Rajesh Dhirubhai Gondaliya and Bhavin Rajeshbhai Gondaliya. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section ***“Our Management”*** on page 111 of this Draft Red Herring Prospectus.

22. Our future success depends on our ability to promote our brand and protect our reputation. Our failure to establish and promote our brand and any damage to our reputation will hinder our growth.

We believe that the market perception of our brands is one of the key factors for the sustained demand of our products amongst consumers. We have consistently allocated significant resources to establish and strengthen the “Kaka” brand and increase our brand recall through various marketing initiatives. As a part of our marketing strategy, we employ various marketing techniques such as TV Ad on regional channels, participation in trade fairs & exhibitions, presence over B2B marketplace (such as tradeindia.com), etc. We have also recently carried advertisement in the cricket match stadium of Rajkot, Gujarat, during the match between India v/s South Africa. Our Company also organizes dealer meets from time to time in order to promote our sales. The advertisement & marketing expenses incurred by our Company in Fiscal 2020, 2021 and 2022 and nine months period ended December 31, 2022 were ₹ 94.03 Lakhs, ₹ 97.25 Lakhs, ₹ 136.70 Lakhs and ₹ 226.86 Lakhs, respectively. Our sales & distribution network is aided by our capable in-house sales and marketing team of 16 employees, which liaise with the dealers on a regular basis for customer inputs, market demands as well as positioning of our products vis-à-vis products of our competitors. We have invested, and will need to continue to dedicate, significant time, efforts and resources to advertising and market promotion initiatives. We may need to devote an even greater portion of our resources to continue to strengthen our brand recognition and build our user base, which may impact our profitability. We cannot guarantee that our marketing efforts will ultimately be successful, as it is affected by numerous factors, including the effectiveness of our marketing campaigns, our ability to provide consistent, high-quality products and services, consumers' satisfaction with our products, as well as supports and services we provide, among others.

23. We have incurred indebtedness which exposes us to various risks which may have an adverse affect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on December 31, 2022, our total outstanding indebtedness was ₹ 2714.44 Lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse affect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see ***“Statement of Financial Indebtedness”*** on page 170 of this Draft Red Herring Prospectus.

24. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

We carry our entire manufacturing operations from our unit located in village Zak, Gandhinagar district, Gujarat. Due to the geographical concentration of our manufacturing operations primarily in Zak, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, we generate major domestic sales through our dealers and customers situated in Gujarat. For the nine months period ended Dec.'22, we derived major portion of our revenue from the state of Gujarat (i.e. 64.47%), followed by Telangana (9.03%), Maharashtra (6.18%) and Karnataka (4.50%). Such geographical concentration of our business in these region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

25. One of our Group Company has incurred losses in the past, which could not be perceived positively by external parties.

Our Group Company, Bakelite Engineering Private Limited has incurred losses in the past, the details of which is given below:

Group Company	For the year ended		
	March 31, 2022	March 31, 2021	March 31, 2020
Bakelite Engineering Private Limited	(32.35)	(0.24)	0.21

(₹ in Lakhs)

Any operating losses/negative networth may not be perceived positively by external parties such as customers, bankers, suppliers and other stakeholders which could adversely affect our credibility and the overall operations of the group and financial conditions and also divert the attention of the management and promoters towards the group company which could have an adverse affect on our operations and financials. For more information, regarding the Company, please refer chapter titled **“Our Group Companies”** beginning on page 193 of this Draft Red Herring Prospectus.

26. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

27. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, sales, purchase, remuneration, loans and advances, purchase of fixed assets, payment of commission etc. For details, please refer to **Note 24- Related Party Transactions**” under Section titled **“Financial Information of the Company”** and Chapter titled **“Capital Structure”** beginning on page 161 and 57 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

28. Dependence upon third party transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

29. We have experienced negative operating cash flows in the past. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions

As per our Restated Financial Statements, our cash flows from operating activities is as set out below:-

Particulars	For the nine months period ended December 31, 2022	For The Year Ended 31st March		
		2022	2021	2020

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

Any loss or profit on the sale of the said investment will be included in the account only when the said investments are sold which may have a material impact on our financial conditions and results of operations.

32. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories, trade receivables and cash & cash equivalents. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section “*Objects of the Issue*” on page 68 of this Draft Red Herring Prospectus.

33. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

34. The Promoters (including Promoter Group) and Directors hold 95.32% of the Equity Shares of our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, properties given by them on lease/rental basis or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. For instance, our Promoter may terminate the lease deed in respect of the main manufacturing unit, which may adversely impact our business operations, results and financial condition. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled **“Our Business”**, **“Our Promoters and Promoter Group”** and **“Note 24 - Related Party Transactions”**, beginning on pages 91, 124 and 161 respectively of this Draft Red Herring Prospectus.

35. Our Promoters, Directors and Promoter Group members/entities have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters/ Directors and thereby, impact our business and operations.

Our Promoters, Directors and Promoter Group entities/members, namely Rajesh Dhirubhai Gondaliya, Bhavin Rajeshbhai Gondaliya, Rajeshkumar Dhirubhai Gondaliya (HUF), Prabhaben Rajeshbhai Gondaliya and Jinal Rajeshbhai Gondaliya along with certain other parties have extended personally guarantee towards loan facilities taken by our Company. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters/Directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer **“Statement of Financial Indebtedness”** on page 170 of this Draft Red Herring Prospectus.

36. Our Company has unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans may adversely affect our cash flows.

As of December 31, 2022, such loans amounted to ₹ 337.22 Lakhs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled **“Statement of Financial Indebtedness”** on page 170 of this Draft Red Herring Prospectus

37. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for our Working Capital requirements, as detailed in the section titled **“Objects of the Issue”** is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled **“Objects of the Issue”** beginning on page 68 of this Draft Red Herring Prospectus.

38. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The deployment of funds as stated in the **“Objects of the Issue”** beginning on page 68 of this Draft Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

39. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled **“Our Business”** on page 91 of this Draft Red Herring Prospectus.

40. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

41. *Relevant copies of educational qualification of four of our directors are not traceable.*

Relevant copies of the educational qualification of our Directors, namely, Rajesh Dhirubhai Gondaliya, Prabhaven Rajeshbhai Gondaliya and Niraj Davariya is not traceable. In accordance with the disclosure requirements in respect of brief biographies of the Directors, we have relied on affidavits provided by such Directors for the purpose of disclosure in the section entitled **“Our Management”** on page 111 of this Draft Red Herring Prospectus.

42. *We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.*

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/ permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. We are required to obtain consent/ approval from our lender before undertaking any such steps which have been mentioned in the loan agreements. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see **“Statement of Financial Indebtedness”** on page 170 of this Draft Red Herring Prospectus.

43. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue is for an amount not exceeding ₹10,000 lakhs, in terms of SEBI ICDR Regulations, our Company is not required to appoint an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances.

44. *We will continue to be controlled by our Promoters after the completion of the Issue.*

After the completion of the Issue, our Promoters will hold majority of our outstanding Equity Shares. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot guarantee that our Promoters and Promoter Group will act in our interest while exercising their rights

45. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results

of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 129 of this Draft Red Herring Prospectus.

46. Certain key performance indicators for certain listed industry peers included in this Draft Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page 74 of the Draft Red Herring Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There maybe different methodologies and formulas used to compute the various ratios.

47. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

48. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

We are currently engaged in the manufacture and supply of polymer based profiles which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with ESI and Provident Fund. Any demand or penalty raised by the concerned authority in future for any previous years or current year will affect the financial position of the Company.

49. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 82 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

51. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be

materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

52. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "***Government and Other Approvals***" on page 188 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("***GST***") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

53. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse affects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse affect on our business, operations, financial condition, profitability and price of our Equity Shares.

54. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non residents and residents are freely permitted(subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

56. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

57. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

58. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

59. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "**Basis for Issue Price**" beginning on page 74 of the

Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

60. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the Bid/ Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

For further details on the method and procedure for Bidding, please see section entitled **“Issue Procedure”** on page 216 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL ECONOMY

Global growth is expected to decelerate sharply to 1.7 percent in 2023-the third weakest pace of growth in nearly three decades, overshadowed only by the global recessions caused by the pandemic and the global financial crisis. This is 1.3 percentage points below previous forecasts, reflecting synchronous policy tightening aimed at containing very high inflation, worsening financial conditions, and continued disruptions from Russia's invasion of Ukraine. The United States, the euro area, and China are all undergoing a period of pronounced weakness, and the resulting spillovers are exacerbating other headwinds faced by Emerging Market and Developing Economies (EMDEs). The combination of slow growth, tightening financial conditions, and heavy indebtedness is likely to weaken investment and trigger corporate defaults. Further negative shocks such as higher inflation, even tighter policy, financial stress, deeper weakness in major economies, or rising geopolitical tensions could push the global economy into recession. In the near term, urgent global efforts are needed to mitigate the risks of global recession and debt distress in EMDEs. Given limited policy space, it is critical that national policy makers ensure that any fiscal support is focused on vulnerable groups, that inflation expectations remain well anchored, and that financial systems continue to be resilient. Policies are also needed to support a major increase in EMDE investment, which can help reverse the slowdown in long-term growth exacerbated by the overlapping shocks of the pandemic, the invasion of Ukraine, and the rapid tightening of global monetary policy. This will require new financing from the international community and from the repurposing of existing spending, such as inefficient agricultural and fuel subsidies.

Regional prospects

The forecast for growth in 2023 and 2024 combined has been downgraded for every EMDE region. Monetary policy tightening, and restrictive global financial conditions are slowing growth, especially in LAC, SAR and SSA. Persistently elevated energy prices are expected to dampen outlooks for energy importers in all regions, while falling metals prices will weigh on terms of trade in LAC and SSA. The projected slowdown in advanced economy import demand is expected to especially impact EAP and ECA. Added to the pandemic recession and incomplete recovery, the outlook implies feeble per capita income growth in LAC, MNA and SSA in the half decade to 2024. Risks to the baseline forecasts are skewed to the downside in all regions. They include the possibility of financial stress and greater spillovers from major advanced economy weakness (especially in EAP, ECA, LAC and SSA), commodity price shocks (especially in ECA, EAP and SAR), conflict (particularly in ECA, MNA, and SSA), and natural disasters (with elevated risk in sub regions in EAP, LAC and SAR).

Investment growth after the pandemic

Investment growth in EMDEs is expected to remain below its average rate of the past two decades through the medium term. This subdued outlook follows a geographically widespread investment growth slowdown in the decade before the COVID-19 pandemic. During the past two decades, investment growth was associated with strong real output growth, robust real credit growth, terms of trade improvements, growth in capital inflows, and investment environment reform spurts. All of these factors have seen a declining trend since the 2007-09 global financial crisis. Weak investment growth is a concern because it dampens potential growth, is associated with weak trade, and makes achieving development and climate-related goals more difficult. Policies to boost investment growth need to be tailored to country circumstances but include comprehensive fiscal and structural reforms, including repurposing of expenditure on inefficient subsidies. Given EMDEs' limited fiscal space, the international community will need to significantly scale up international cooperation and official financing and grants as well as help leverage private sector financing for sufficient investment to materialize.

Global risks and policy challenges

Risks are tilted to the downside. Central banks may need to tighten more than expected to bring inflation under control. Given already-weak global growth, this could result in a sharper slowdown or even a global recession this year. A rising number of people are affected by food insecurity, especially in low-income countries. Fiscal challenges in emerging market and developing economies (EMDEs) have become more acute, as exemplified by a precipitous drop in bond issuance. The long-term effects of the adverse shocks of the past three years have led to substantial losses, particularly for EMDE investment and output, which could grow larger if downside scenarios materialize.

Global growth has slowed to the extent that the global economy is perilously close to falling into recession defined as a contraction in annual global per capita income only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies (figure A). Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers (figure B).

Global growth is forecast to slow to 1.7 percent in 2023 (figure C). This pace of growth would be the third weakest in nearly three decades, overshadowed only by the global recessions caused by the pandemic in 2020 and the global financial crisis in 2009. This forecast is 1.3 percentage points lower than in June, largely reflecting more aggressive monetary policy tightening, deteriorating financial conditions, and declining confidence. Growth projections have been downgraded for almost all advanced economies and about two-thirds of EMDEs in 2023, and for about half of all countries in 2024 (figure D). Global trade is also expected to slow sharply alongside global growth, despite support from a continued recovery in services trade. Downgrades to growth projections mean that global activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon, with EMDEs accounting for most of the shortfall from trend (figure E). This suggests that the negative shocks of the past three years; namely the pandemic, the invasion of Ukraine, and the rapid increase in inflation and associated tightening of monetary policy worldwide are having a lasting impact on economic prospects.

As a result of the sharp slowdown in global growth, per capita income is not expected to surpass 2019 levels until at least 2024 in about one-third of EMDEs. Per capita income growth is expected to be slowest where poverty is highest (figure F). In Sub-Saharan Africa which accounts for about 60 percent of the world’s poor growth in per capita income over 2023-24 is forecast to average only 1.2 percent, far less than the pace that would be needed over the remainder of the decade to reach a 3 percent poverty rate by 2030.

A. G7 policy rates

B. EMDE sovereign spread changes in 2022, by credit rating and energy exporter status

C. Global growth

D. Share of countries with downgrades in growth forecasts

E. Deviation of output from pre-pandemic trends

F. EMDE per capita GDP growth, by bottom and top quartile poverty headcount ratio

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. EMDE growth is anticipated to remain essentially unchanged in 2023 relative to last year, as a pickup in China offsets a decline in other EMDEs. Excluding China, EMDE growth is forecast to decelerate from 3.8 percent in 2022 to 2.7 percent in 2023 as significantly

weaker external demand is compounded by high inflation, tighter financial conditions, and other domestic headwinds. The deviation between EMDE investment and its pre-pandemic trend is expected to remain substantial. EMDE investment growth is envisaged to remain below its 2000-21 average pace, dampened significantly by weakening activity, heightened uncertainty, and rising borrowing costs. Low-income countries (LICs) are expected to grow 5.1 percent in 2023, with forecasts downgraded in about 65 percent of countries. Cost-of-living increases and a deterioration in the external environment are weighing heavily on activity in many LICs and compounding weakness in LICs with fragile and conflict affected situations (FCS).

As a result of the sharp slowdown in global growth, per capita income is not expected to surpass 2019 levels until at least 2024 in about one-third of EMDEs. Per capita income growth is expected to be slowest where poverty is highest (figure 1.1.F). In Sub-Saharan Africa—which accounts for about 60 percent of the world’s poor growth in per capita income over 2023-24 is forecast to average only 1.2 percent, far less than the pace that would be needed over the remainder of the decade to reach a 3 percent poverty rate by 2030.

Global risks and policy challenges

Risks are tilted to the downside. Central banks may need to tighten more than expected to bring inflation under control. Given already-weak global growth, this could result in a sharper slowdown or even a global recession this year. A rising number of people are affected by food insecurity, especially in low-income countries. Fiscal challenges in emerging market and developing economies (EMDEs) have become more acute, as exemplified by a precipitous drop in bond issuance. The long-term effects of the adverse shocks of the past three years have led to substantial losses, particularly for EMDE investment and output, which could grow larger if downside scenarios materialize.

Global trade

Supply chain pressures continue to ease and are returning to historical averages amid rising inventories and falling shipping costs, while supplier delivery times are increasing at a slower pace. Global trade growth has been revised down substantially, in part reflecting deteriorating global demand. The recovery of global trade following the 2020 global recession is on course to be substantially weaker than the rebounds seen after previous global recessions.

Global inflation and financial developments

Global inflation surged in 2022. Short-term inflation expectations have risen in most countries; however, long-term expectations have been more stable. Global inflation has started to abate as fewer countries experience accelerating price increases. Amid faster-than-expected advanced economy monetary policy tightening, the currencies of emerging market and developing economies (EMDEs) with large fiscal deficits have depreciated sharply. Bond issuance in EMDEs has also declined markedly, while sovereign borrowing spreads have risen particularly sharply in energy importers with weak credit ratings.

INDIAN ECONOMY

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronised policy rate hikes to curb inflation.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of GST they pay, while the ECGLS is easing their debt servicing concerns.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India's CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. Growth is expected to be brisk in FY24 as a vigorous credit disbursal, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at ₹ 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at ₹ 147,686 crore (US\$ 17.92 billion).
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at ₹ 58,762 crore (US\$ 7.13 billion).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports.

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- The Union Budget of 2022-23 was presented on February 1, 2022, by the Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman. The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at ₹ 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- In August 2022, a Special Food Processing Fund of ₹ 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of ₹ 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

Growth Outlook: 2023-24

India's recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector's caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Growth Magnets in this Decade (2023-2030)

After a long period of balance sheet repair in the financial and corporate sector, the financial cycle is poised to turn upward. As the health and economic shocks of the pandemic and the spike in commodity prices in 2022 wear off, the Indian economy is thus well placed to grow at its potential in the coming decade, similar to the growth experience of the economy after 2003. This is the primary reason for expecting India's growth outlook to be better than it was in the pre-pandemic years. The sound and healthy financial system developed over the last few years will ensure efficient credit provisioning, contributing to higher growth in the coming years through higher investments and consumption. Thanks to India's digital revolution and formalisation, banks have far more information about their customer's credit risks than before, thus being able to make credit and pricing decisions better than before.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDUSTRY SCENARIO

Due to the enormous potential of the Indian market, local businesses have been encouraged to develop their technical skills, meet high-quality requirements, and expand their capabilities across a wide range of sectors of the growing plastics industry.

There have been phenomenal advancements in the petrochemical industry, and combined with the progress in the plastic machinery sector, they have helped forward the plastic processing industry immensely. This has made it easier for plastic processors to increase their capacity to serve both the domestic and international markets. Currently, the Indian plastic processing industry comprises approximately 30,000 units that use injection molding, blow molding, extrusion, and calendaring to create a wide range of products. Plastic material is becoming increasingly important across various industries, and per capita consumption is rising quickly. Traditional materials are being quickly replaced by plastic technology, processing equipment, expertise, and cost-effective manufacturing. The ability to serve international markets results from the skills developed in most of this industry's areas combined with inherent abilities. The Indian plastics industry has advanced significantly over the past few decades, becoming one of the nation's most significant sectors with a considerable base.

The consumption of plastics in India has significant regional variation, with Western India accounting for 47%, Northern India for 23%, and Southern India for 21%. The end-use sectors of automotive, packaging (including bulk packaging), plastics applications, electronic appliances, etc., account for the majority of consumption in Northern India and are located mostly in Uttar Pradesh and Delhi-NCR. However, other regions, including Rajasthan, Punjab, Haryana, Uttarakhand, J&K, and Himachal Pradesh, are anticipated to see growth in plastic processing due to increasing feedstock supply and a greater focus on the manufacturing sector.

The use of plasticulture can significantly reduce costs, which can result in increased crop quality and yield. Applications of plasticulture provide advantages in terms of conservation of water, water use efficiency and fertiliser use efficiency. Each application can significantly reduce water use by 30% to 100%. The total loss of water due to seepage may be reduced to zero in the case of agricultural ponds walled with plastic film, which is very advantageous. Additionally, effective fertiliser usage may reduce expenses, which is again beneficial to farmers.

The plastics industry is currently home to about 50,000 industries, most of which are micro, small, and medium-sized enterprises (MSMEs). These enterprises contribute ₹ 3.5 lakh crore (US\$ 42.89 billion) to India's economy and employ more than 50,000 people. The country recycles plastic at a rate of 60%, which is higher than that of developed nations. The "Make in India," "Skill India," "Swachh Bharat," and "Digital India" initiatives of the government are increasing plastic production, and by 2027, it is expected that the plastics industry will generate ₹ 10 lakh billion (US\$ 122.54 billion) annual revenue, with two lakh tonnes of exports.

Plastics is essentially a set of materials, not just one, which is why it seems that it may be utilized almost anywhere. There are a vast variety of plastic material types, and many of them, like polyethylene, PVC, acrylic, etc., have efficient and adaptable qualities.

Polyethylene Terephthalate (PET): Often known as polyethylene terephthalate, is the primary material used to make plastics in category one. Because of its vast utility, it is ranked first. Due to its powerful ability to stop oxygen from getting in and tainting the goods within, it is mostly used for food and beverage packaging.

Low-Density Polyethylene (LDPE): Unlike HDPE, LDPE is characterized by low-density molecules, giving this resin a thinner and more flexible design. It has the simplest structure of all plastics, making it easy and cheap to produce. Used in plastic bags, six-pack rings, various containers, dispensing bottles, and most famously for plastic wraps, it is not often recycled through curbside programs.

Polyvinyl Chloride (PVC): As a synthetic plastic polymer, polyvinyl chloride is the world's third most extensively manufactured plastic. There are essentially two types of it: stiff and flexible. PVC is frequently used in buildings and construction to create pipes and profiles for doors and windows. It may be softer and more flexible when combined with other materials and used for flooring, wiring, and plumbing insulation. PVC is currently replacing conventional building materials, including wood, metal, concrete, rubber, ceramics, etc., in various applications because of its adaptable qualities, such as lightness, durability, and ease of processing. PVC is still scarcely recyclable despite its many benefits and the plastics industry's attempts to make it more recyclable; as a result, it should be avoided wherever possible.

Other Plastics: Plastic will be included in this group if it cannot be distinguished from other categories. The most well-known polymers in this class are polycarbonates (PC), used to create robust, durable products. In order to protect the eyes, polycarbonate is frequently used to make lenses for safety, sports, and sunglasses. However, they may also be found on compact discs (CD) and, more frequently, on smartphones. The usage of these resins has generated debate in recent years because, when they are flushed at high temperatures, they emit bisphenol A (BPA), a chemical that is listed as potentially dangerous to the environment.

Additionally, because BPA does not decompose in landfills, it will remain persistent in the environment and eventually make its way into water bodies, leading to aquatic contamination. These plastics are seldom ever recycled

Indian plastic industry market is one of the leading sectors in the country's economy. The history of the plastic industry in India dates to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,000 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floorcoverings, medical items, packaging items, plastic films, pipes, raw material, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of ₹ 3 lakh crores (US\$ 37.8 billion) of economic activity to ₹ 10 lakh crores (US\$ 126 billion) in 4-5 years.

Ten Plastic Parks have been approved in the country by The Department of Chemicals and Petrochemicals. Among these, 6 plastic parks have received final approval from the following states – Madhya Pradesh (2 parks), Assam (1 park), Tamil Nadu (1 park), Odisha (1 park) and Jharkhand (1 park). These parks are intended to boost employment and attain environmentally sustainable growth.

Export Trend

Overall, the total plastics exports between April-September 2022 stood at US\$ 6.38 billion. During this time period, the exports of plastic raw materials, medical items, and pipes and fittings increased by 32.3%, 24.8% and 17.9% over the same time last year, respectively.

The cumulative exports of plastics and related materials during 2021-22 were valued at US\$ 13.34 billion. This was a 33.4% increase from the 2020-21 exports valued at US\$ 10 billion. Plastic raw materials were the largest exported category and constituted 30.7% of the total exports in 2021-22; it recorded a growth of 26.5% over the previous year. Plastic films and sheets were the second largest category, comprised 15.2% of the total exports, and grew 32.7% over the previous year.

In May 2022, the exports of plastics and linoleum from India were valued at US\$ 1,073 million. During the same period, medical items of plastics; plastic films & sheets; plastic pipes & fittings; FRP & composites; packaging items; cordage fishnets & monofilaments; and miscellaneous products recorded strong growth. The cumulative exports for April and May 2022 grew 2.6% YoY to US\$ 2,173 million.

Government Initiatives

The Union Ministry of Commerce and Industry of India targets to increase the plastic exports of the country to US\$ 25 billion by 2025. There are multiple plastic parks are being set up in the country in a phased manner that will help improve the plastic manufacturing outputs of the country. Under the plastic park schemes, funds of up to 50% of the project costs or a ceiling cost of ₹ 40 crore (US\$ 5 million) per project.

Government initiatives like “Digital India”, “Make in India”, and “Skill India” will also boost India's Plastic industry. For instance, under the “Digital India” program, the government aims to reduce the import dependence of products from other countries, which will lift the local plastic part manufacturers.

The Plastic Export Promotion Council (PLEXCONCIL)

The PLEXCONCIL was established by the Ministry of Commerce and Industry in 1955. The main objective of this non-profitable organization is to showcase India as a reliable supplier of high-quality products. PLEXCONCIL is the apex body of the plastics industry in the country and represents more than 2,500 exporters who manufacture and trade plastics products ranging from plastic raw materials to semi-finished and finished items.

Policy initiatives taken for promotion of Plastics Industry

For the promotion of the Plastic Industry in the country, the Government has taken various industry friendly policy initiatives such as deregulation of the petrochemical sector and allowing 100% FDI under the automatic route to facilitate fresh investments. The Department of Chemicals and Petrochemicals has approved a Scheme for setting up of need based Plastic Parks to promote the domestic downstream plastic processing industry. A scheme of setting up “Centres of Excellence (CoEs)” which aims at improving the existing petrochemical technology and research environment in the country and to promote the development of new applications of polymers and plastics, has also been implemented.

Central Institute of Plastics Engineering & Technology (CIPET), an autonomous academic and training institute under the Department of Chemicals and Petrochemicals caters to human resource and training requirements of the plastics and allied industries in the petrochemicals sector through its 23 centres spread across the country which include 05 high Learning Centres, 11 Diploma Centres, 01 Vocational Training Centre, 03 Specialized Units viz. Advanced Tooling and Plastics Product Development Centre (ATPDC), Advanced Plastics Processing Technology Centre (APPTC), Plastic Waste management Centre, 02 R&D Wings and Polymer Data Services (PDS) centre. Setting up of CIPET centres is a dynamic process based on the demand and growth of plastic industries and requisite infrastructural and financial support of the State Government. During 2015-16, the Government has approved setting up 05 Centres of CIPET.

Setup of new integrated manufacturing facility

We are currently in process of setting up a new manufacturing plant in village Lasundra, Kheda district (Gujarat), in order to increase our manufacturing capabilities. The land on which the said plant is being constructed comprises of over 49,000 sq. mtrs. area and is obtained by us on lease from our Promoter Director, Mr. Bhavin Rajeshbhai Gondaliya for a period of 30 years. The total cost for setting up new manufacturing plant is estimated to be ₹ 27 crores. In order to finance the said project, we have been sanctioned a term loan of ₹ 20 crores from SIDBI. Further, the remaining cost is expected to be funded from the promoter's contribution and/or any other source as may deem fit by the Board of Directors. We intend to gradually shift our existing manufacturing operations (phase-wise) from the existing three facilities to the aforementioned new facility in the future. The plant & machinery at the facility under expansion is targeted to be more automated to reduce human intervention and thus decreasing the scope of human error. We believe that the entire activity will lead to higher efficiency and production output.

Expand our domestic presence in existing and new markets

Our Company has constantly expanded the dealers network across the country and this continues to be one of the core strategies of the Company to further expand the dealers network. Having a wider product portfolio provides confidence to new dealers to engage with our Company. While we believe in growing the dealers network, proper area marking and financial credibility check is done before appointing a dealer to ensure a good service and reputation in the market without hurting our existing channel. Going forward we intend to focus on current markets to increase our customer base and to tap new market and increase our geographical reach and customer base.

Focus on consistently meeting quality standards

Our Company intends to focus on adhering to the quality standards of the products. Quality of the product is very important for the company from both dealer and end user point of view. Continuous quality review of products and timely corrective measures in case of quality diversion are keys for maintaining quality standards of the products. Providing the desired and good quality products help us in enhancing customer trust and maintaining long term relationships with them.

Maintaining cordial relationship with our Suppliers, Customer and employees

We believe in maintaining good relationship with our suppliers, customers and employees which are the most important factor to keep our Company growing. Our dedicated and focused approach and efficient and timely delivery of products has helped us build strong relationships with our existing customers over a number of years. Further, we believe that establishing strong, mutually beneficial long-term relationships with strategic suppliers is a critical step in improving performance across the supply chain, generating greater cost efficiency and enabling the business to grow and develop.

Manufacturing Process of PVC & WPC Profile:

Formation of the resin compound: PVC Profile manufacturing process starts with dry blending of PVC resin with fillers, stabilizers, pigments and additives in appropriate and accurate proportions so that quality of the final product can be maintained.

Dry Blending: The mixture of above components is then blended in a heating mixer with high speed friction heat & cooling to make the mixture uniform.

Extrusion and Die-casting: The extrusion procedure is the main stage of the manufacturing process. The mixture then goes into extrusion machines, wherein the mixture plastisizes in extrusion machine which then goes into different dies and moulds which are made to give profiles shape according to the pre-defined designs and specifications.

Cooling & Sizing: The extruded material is then fed in the calibrator that assist in cooling and shaping of profile with the help of vacuum and water.

Puller/ Haul Off: After the cooling process, the product goes through haul off unit which is basically used to pull the profile.

Sawing and Cutting: After being sufficiently cooled, the extruded profiles are then cut into standardised shapes.

Quality Check: In this step, the profiles are checked for any variations in dimensions, sizes & colours. If found satisfactory, they are sent to next level of printing and coating and if not, they are treated as rejected goods, which further go into scrap cutting and recycling process through grinder and dry blending process.

Printing and Coating Process: The profiles which are approved by quality checkers, are sent for printing process where it first gets printed with roller-print process and is then passed through the surface UV Coating & curing line to give the required high gloss/ gloss/ mat finish as per the design specifications.

Quality Check: In this step, quality check is performed to verify that the printing and coating process is done properly. If found satisfactory it goes into packaging, storage and dispatch; if not, the product again goes to rejected goods to get recycled.

Packaging, Storage and Dispatch Department: The final profiles are then packed taking care of scratches and are finally dispatched from the production facility to our warehouse.

The similar type of process is followed to manufacture WPC Profile & Sheet. In case of WPC, the additional raw materials i.e. wood fibre and foaming agents are mixed to form the resin compound.

Manufacturing Process of uPVC window and door profile:

Formation of the resin compound: uPVC Profile manufacturing process starts with dry blending of PVC resin with fillers, stabilizers, pigments, titanium dioxide (TiO₂), impact modifier and additives in appropriate and accurate proportions so that quality of the final product can be maintained.

Dry Blending: The mixture of above components is then blended in a heating mixer with high speed friction heat & cooling to make the mixture uniform.

Extrusion and Die-casting: The extrusion procedure is the main stage of the manufacturing process. The mixture then goes into extrusion machines, wherein the mixture plastisizes in extrusion machine which then goes into different dies and moulds which are made to give profiles shape according to the pre-defined designs and specifications. There are number of dies for uPVC Door /Window Profile such as 3 Track sliding system for Door Window, 2 Track Sliding System, Openable Doors/Windows, Fixed Windows etc.

Cooling & Sizing: The extruded material is then fed in the calibrator that assist in cooling and shaping of profile with the help of vacuum and water.

Water Tank & Tank Plate: The extruded product is then passed through water tank where tank plates freeze the shape and cools down the product.

Puller/ Haul Off: After the cooling process, the product goes through haul off unit which is basically used to pull the profile.

Sawing and Cutting: After being sufficiently cooled, the extruded profiles are then cut into standardised shapes.

Quality Check: In this step, the profiles are checked for any variations in dimensions, sizes & colours. If found satisfactory, they go to next level for packaging, otherwise they are treated as rejected goods, which then go into scrap cutting and recycling process through grinder and dry blending process.

Packaging, Storage and Dispatch Department: The final profiles are then packed taking care of scratches and are finally dispatched from the production facility to our warehouse.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth

transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
